PROJECTS

Responsive Personal Website

Fall 2021

[React](#) | [Tailwind CSS](#) | [Three.js](#)

Personal website that is built as a portal for showcasing completed and ongoing projects

- Rendered custom 3-D dark-mode supported background that utilizes Three.js library
- Responsive design that accounts for screen sizes, overflows, and styling
- React components properly separated to manage and debug website behaviors

Calculator Discord Bot - Wargroove

Fall 2021

[Node.js](#) | [Discord API](#) | [Heroku](#)

Bot that handles custom damage inputs not natively offered in the game Wargroove

- Used in the official Wargroove discord channel
- Integrated Discord API features for interacting with Discord channel messages
- Custom built arg-parser to allow convenient user commands and supports precise error messages to aid user commands
- Twitch Chat integration for personal account

Wguides – Online Guide Blog

Fall 2021

[Next.js](#) | [React](#) | [GraphQL](#) | [Tailwind CSS](#)

An online blog containing strategy guides which is managed by a CMS

- GraphCMS API used to create and update content and support multiple editors
- React hooks to dynamically fetch data from API using GraphQL queries
- Responsive Design
