PROJECTS

Responsive Personal Website

📅 Fall 2021

[React](#) | [Tailwind CSS](#) | [Three.js](#)

Personal website that is built as a portal for showcasing completed and ongoing projects

- Rendered custom 3-D dark-mode supported background that utilizes Three.js library
- Responsive design that accounts for screen sizes, overflows, and styling
- React components properly separated to manage and debug website behaviors

Calculator Discord Bot - Wargroove

📅 Fall 2021

[Node.js](#) | [Discord API](#) | [Heroku](#)

Bot that handles custom damage inputs not natively offered in the game Wargroove

- Used in the official Wargroove discord channel
- Integrated Discord API features for interacting with Discord channel messages
- Custom built arg-parser to allow convenient user commands and supports precise error messages to aid user commands
- Twitch Chat integration for personal account

Natural Language Predictor

📅 Summer 2021

[Python](#) | [AI](#)

AI that creates a statistical model to predict sentence structures of given input

- Generated probability tables necessary for the creation of the statistical model
- Trained and created HMM (hidden Markov Model) for the AI to predict future inputs
- Assignment task for CSC384 (Intro to AI)

SKILLS

Languages

C, C++, Java, Python, HTML, CSS, JavaScript, SQL

Frameworks

React, Node.js, Express.js, jQuery, Tailwind CSS

Tools

Git, Expo, Regex, MySQL database tools, Heroku
